

## SolarInvert Energy Solutions

# Indonesia user-side energy storage products

## Overview

---

Why is battery energy storage system important in Indonesia?

However, given the challenge of Indonesia's geological landscape, with many off-grid and remote areas, there is growing intermittency issue that hamper the development of solar and wind generation. Hence, the battery energy storage system (BESS) technologies have a critical role in the development of Indonesia's renewable energy.

Does Indonesia need a solar energy storage system?

As Southeast Asia's largest economy, Indonesia aims to source 23% of its energy from renewables by 2025, with plans to escalate this ratio by 2050. Energy storage systems (ESS) are critical to stabilizing the nation's grid and enabling seamless integration of solar power.

Why do Indonesians need energy storage?

Indonesia's focus on industrial growth creates a demand for reliable power. BESS can offer backup power, improve power quality, and enable cost savings through peak shaving. The Indonesian government recognizes the importance of energy storage.

Can EVE Energy solve power supply shortages in Indonesia?

To address the electricity demand in remote areas and islands across Indonesia, EVE Energy launched its 10 kWh wall-mounted residential ESS system and 25 kWh high-voltage stackable residential ESS system overseas for the first time. These solutions could resolve power supply shortages and help users utilize self-generated electricity.

Why is EVE Energy a game-changer for Indonesia's Infrastructure?

EVE Energy's showcase highlighted its pivotal role in supporting these goals through innovative technology tailored to Indonesia's unique challenges, including grid instability and remote electrification needs. EVE Energy's

flagship Mr. Giant energy storage system emerged as a game-changer for Indonesia's infrastructure.

What are some potential energy storage projects in ASEAN?

Other potential energy storage projects are the Cirata projects—the largest floating solar planned for ASEAN at 145 MW in Purwakarta region, West Java and eastern parts of Indonesia such as 2x50 MW in Bali and 70MW in the new capital, the city of Nusantara, East Kalimantan.
