## Overview

What is commercial and industrial energy?

Commercial and industrial energy deals with the storage of backup power. It helps in the prevention of energy losses and disruption related to electricity cut issues. It is widely required in critical facilities, such as power faculties where a short power outage can lead to lives at risk.

Why do we need a power supply system?

It is widely required in critical facilities, such as power faculties where a short power outage can lead to lives at risk. Thus, to tackle the electricity outage, commercial and industrial energy is expected to witness increased demand during the forecast period.

What is the growth rate of industrial energy storage?

The majority of the growth is due to forklifts (8% CAGR). UPS and data centers show moderate growth (4% CAGR) and telecom backup battery demand shows the lowest growth level (2% CAGR) through 2030. Figure 8. Projected global industrial energy storage deployments by application.

Why is commercial & industrial energy a major restraint?

However, the major restraint for the commercial and industrial energy market is its higher upfront cost and large storage space requirements. Commercial and industrial energy finds its application in goods production, transportation, heating, cooling, and other activities based on electricity and energy consumption.

Why do we need backup energy storage during a power outage?

Thus, to tackle the electricity outage, commercial and industrial energy is expected to witness increased demand during the forecast period. In addition, the energy is required in extreme weather conditions, which lead to power cut, thus making backup energy storage necessary in emergency conditions.

What are the different types of energy storage technologies?

This report covers the following energy storage technologies: lithium-ion batteries, lead-acid batteries, pumped-storage hydropower, compressed-air energy storage, redox flow batteries, hydrogen, building thermal energy storage, and select long-duration energy storage technologies.
