Interior installation of outdoor base station cabinet

CE UN38.3 MSDS

Overview

First of all, familiarize yourself with your cabinet's layout. Place the cabinets according to the drawings. Wherever outdoor cabinets include hardware in a sealed bag, perfectly counted for your project. Installation is easier with two people, although it is.

All cabinets and fillers have partially pre-drilled "universal fit" holes that perfectly align for a precision fit. Finish drilling the holes of two adjoining cabinets using a 1/4" drill bit. Fasten the cabinets together using the hardware.

1. Use clamps to hold the cabinets in place.

Leveling the cabinets is the most important part of the installation. If you do not level the cabinets properly the doors will not align. Level the.

Once leveled, fasten cabinets to walls using common hardware (not provided). For concrete block or stucco walls, stainless steel.

Can a cabinet be installed indoors or outdoors?

A cabinet/enclosure can be installed indoors or outdoors, placed on a small foundation, or wall/pole mounted. A cabinet installed indoors uses the existing building environment (heat and air conditioning) to maintain temperature requirements. An outdoor cabinet contains its own environmental controls.

What should a shelter & outdoor equipment cabinet look like?

Shelters and outdoor equipment cabinets shall be of the type designed for electronic equipment housing and accordingly fitted with locking doors. Buildings and shelters should utilize an alarm system capable of notifying a remote location of tampering, cable breakage, power outage, or system failure.

What is the difference between a cabinet and an outdoor cabinet?

A cabinet installed indoors uses the existing building environment (heat and air conditioning) to maintain temperature requirements. An outdoor cabinet contains its own environmental controls. An enclosure that houses communications equipment and ancillary systems only and is fully or partially

buried in soil.

What are self-contained outdoor cabinets?

Self-contained outdoor cabinets (land or rooftop), or semi/fully underground vaults. These are often used where zoning or site availability are issues, sometimes in conjunction with camouflaged towers or antennas. The shelter may be installed at an existing tower site, a new tower site (green site) or on the roof of an existing building.

Can a standard rack be installed in a pre-fab building?

A standard rack is intended for indoor installation only in buildings or shelters. Pre-fab buildings shelters, cabinets, and vaults may have equipment fully or partially installed prior to building shipment, requiring additional building specifications to allow lifting with equipment installed.
