

SolarInvert Energy Solutions

Inverter installation for photovoltaic power station in Thailand

Overview

Where to buy solar panels in Thailand?

Kaset Por Peang: Kaset Por Peang is a smaller solar electric system equipment supply house in Bangkok, but the owner is very helpful and knowledgeable. Plus they have a solar electric system installation team. SCG: SCG is one of the biggest construction companies in Thailand and has several solar system packages.

How do solar panels work in Thailand?

Solar charge controllers: Solar charge controllers take the electricity coming from the solar panels and turn it into a steady, usable voltage — 220 volts in Thailand's case. Batteries: In off-grid and hybrid solar systems, you'll need batteries to store the power that your solar panels generate and you don't use.

Are rooftop solar panels a viable solution in Thailand?

Amidst the escalating costs of electricity in Thailand, businesses and households are turning towards renewable energy sources. Particularly rooftop solar panels, are one of the viable solutions. The allure of reduced electricity bills and environmental sustainability is propelling the adoption of solar technology across the nation.

Should you use a solar electric system in Thailand?

With a solar electric system, you can turn on your ACs anytime without worrying about electricity costs. Use electricity in remote regions of Thailand: If you want to build a house in a remote region of Thailand that doesn't have electricity available nearby, an off-grid solar system is a great option.

How does a solar meter work in Thailand?

Basically, when you install a solar electric system in your home, during peak hours you use electricity generated from your solar system. During off-peak

hours when electricity costs are lower, you use electricity from Thailand's electricity authorities. You can contact your local MEA or PEA office to have a TOU meter installed in your home.

Where can I install solar panels?

You can install them on the roof of your home or on dedicated stands somewhere on your property, if you have the space. Solar charge controllers: Solar charge controllers take the electricity coming from the solar panels and turn it into a steady, usable voltage — 220 volts in Thailand's case.
