Iraq Solar Panel Photovoltaic

Overview

The Al-Zawraa General Company, part of Iraq's Ministry of Industry and Minerals, has unveiled plans to establish an integrated and advanced manufacturing plant for solar panels, with an annual production capacity of 750 megawatts - supporting the government's drive toward clean energy. Does Iraq have a solar power plant?

The contracts also cover a water intake project for injection into oil reservoirs. The solar power plant will be Iraq's first utility-scale solar power project. While the country has several other solar plans in the pipeline, the TotalEnergies project is the first to proceed to the implementation phase.

Will TotalEnergies build a solar power plant in Iraq?

French energy major TotalEnergies will build a 1-gigawatt solar power plant in Iraq as part of a cluster of contracts it was awarded in 2021 for an integrated project that entails a total investment of \$27 billion over 30 years.

What is Iraq's first utility-scale solar power project?

Utility-scale solar power project The solar power plant will be Iraq's first utility-scale solar power project. While the country has several other solar plans in the pipeline, the TotalEnergies project is the first to proceed to the implementation phase.

How much solar power does Iraq have in 2023?

According to the latest statistics by the International Renewable Energy Agency, it had just 1,599 megawatts of renewable energy capacity at the end of 2023. Iraq has abundant untapped solar resources that could allow it to achieve its target and reduce reliance on imports of electricity.

How reliable is Iraq's electricity grid?

Iraq's electrical power supply grid faces significant reliability challenges due to a combination of infrastructure damage, high loss rates, and frequent power

outages. 456 Infrastructure Condition: The grid has suffered extensive damage from decades of conflict, resulting in inadequate transmission and distribution systems.

Will Iran be able to meet a third of Iraq's electricity needs?

However, supplies have often been erratic or halted during peak demand periods in Iran. In October 2023, Sudani announced a target of meeting one-third of Iraq's electricity needs from renewable energy sources by 2030. Based on current demand trends, this would require the development of around 18 gigawatts of renewable energy capacity.
