

SolarInvert Energy Solutions

Irish Power Storage Vehicle Equipment Company

Overview

Which battery energy storage systems are available in Ireland?

The Kylemore Battery Energy Storage System in Dublin went into operation in 2023 and has the capability of providing 30MW of fast-acting storage. The South Wall Battery Energy Storage System went live in 2023 and has the capability of providing 30MW of fast-acting energy storage.

How many MW of battery storage capacity are there in Ireland?

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery projects, as well as additional renewable enabling technologies.

Will battery storage help Ireland generate 80% renewable electricity by 2030?

Ireland has set a target of generating 80% renewable electricity by 2030. Deployment of battery storage will be capable of responding in milliseconds to frequency changes, importing or exporting electricity from the grid as needed, and helping efficiently stabilise the grid, while guaranteeing reliable electricity supply for users.

What is RWE renewables' second Irish-based battery storage project?

RWE Renewables' second Irish-based battery storage project is in Co Monaghan. It is a 60 megawatt (MW) facility at Lisdrumdoagh, (Lisdrum for short) and is capable of providing a rapid delivery of electricity into the power grid to balance fluctuations and can also be used as a short term electricity back up to help prevent power outages.

What is the current market mechanism in Ireland?

Flexibility on offer The current market mechanism in Ireland allows operators to sell services like inertia, short circuit power and reactive power as provided by the synchronous condenser technology to the transmission system

operator.
