Overview

How much does a roof cost in Estonia?

Eastland said roofing material he was able to source in Estonia came in at around 60 percent less than originally budgeted four (though still coming in at £118,000, or nearly €138,000).

Can a solar panel be used as a roof?

Their first of its kind product is called Click-on, which makes it possible to render essentially any solar panel into 2-in-1 weatherproof roofing material without any additional sublayer. Click-on is universal and can be used for residential and commercial roofs as well as solar halls, carports, and facades.

Can solar panels on roofs be aesthetic?

Solar panels on the roofs can be aesthetic to look at for the naked eye – three guys, the founders of Estonian CleanTech startup Solarstone, figured out how this can be done.

Are building-integrated solar panels a roofing material?

This created an immediate understanding by three Solarstone founders Mait Kukk, Silver Aednik, and Mattis Jürimäe that they need to start building-integrated solar panels that simultaneously act as a roofing material. These materials are called building-integrated photovoltaics (BIPV).

Are solar panels weatherproof?

“We use solar panels from the world's top manufacturers for our full solar roof. We add proprietary and patented aluminum technology, called Click-On frame, that turns a conventional solar panel into the weatherproof roofing material,” Solarstone CEO, Silver Aednik, told pv magazine. “The result is an aesthetically pleasing two-in-one solar roof.”

Where is Solarstone based?

Solarstone's factory in Viljandi is located on an area of 1,200 sqm, where anyone can pay a visit (with prior notice) and get acquainted with the product range. „With today's setup, we can produce 20,000 tile interlocking solar modules per year, resulting in approximately 715 design solar roofs and 25,000 Click-on kits.
