

## **SolarInvert Energy Solutions**

# **Is there an energy storage power station in Oman**

## Overview

---

Muscat – May 31, 2025, Oman's Minister of Energy and Minerals has announced that the country will soon launch its first renewable energy storage project. What percentage of Oman has access to electricity?

According to the World Bank, access to electricity amount to 98.0 %. The Oman Power and Water Procurement Company (OPWP) is the planning body for power supplies in the country. OPWP is responsible for securing electricity and water production capacities in the country and the single buyer of power and water for all IPP/IWPP projects.

What is the solar power potential in Oman?

Oman receives a tremendous amount of solar radiation throughout the year, which is among the highest in the world\ . There is significant scope for harnessing and developing solar energy resources throughout the Sultanate.

How much will Oman's power sector invest in the next six years?

Taken together with parallel plans for the implementation of a raft of Wind IPPs and combined cycle gas turbine (CCGT) power projects, total investment in Oman's power sector is set to balloon to well over \$5 billion over the next six years through to 2030.

How much energy does Oman use a year?

Demand also changes daily, hourly, and even in the summer and winter. The last reported data from Oman show that each Omani annually consumes around 6550 kWh on average (S.A.O.C 2017). Based on this information and the population of the area, the size of the wind power plant is considered at 10 MW.

Does Oman have a wind power station?

As of this article's writing, Oman has no industrial wind power stations, and the country's wind turbines are mainly used for research purposes. However,

this situation is changing, beginning with developing an understanding of the country's wind power potential.

What is the main energy source in Oman?

Unlike the national energy production, gas accounts for the largest amount of primary energy supply in Oman (18,040 ktoe), followed by crude oil (9,927 ktoe). Oman is a fossil fuel exporting country. In 2011, the country was exporting 39,481 ktoe of crude oil, 2,152 ktoe of oil products and 9,797 ktoe of natural gas.

## Is there an energy storage power station in Oman

### Power Stations

- High-efficiency 200W solar panel for optimal energy capture - Durable and weather-resistant design for outdoor use
- Foldable and portable for easy ...
