

SolarInvert Energy Solutions

Israel purchases new photovoltaic panels and batteries

Overview

Ofer Yannay founded and heads solar power firm Nofar Energy. Among the firm's innovations is floating solar panels on a reservoir, harnessing the underutilized surface area to generate electricity. According to Yannay, Israel could get 100% of its electricity.

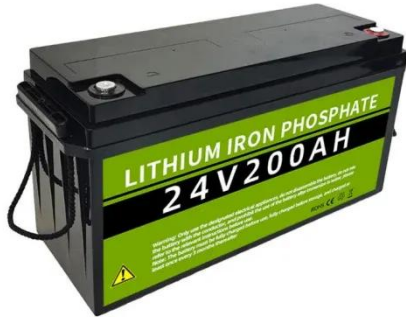

Another key obstacle is the electricity grid, which does not have the capacity to absorb the shift to decentralized solar power, despite repeated demands over the years to expand.

The 2018 electricity reform guarantees that all energy installations, including storage, are connected to the national grid on the grounds that nobody.

Yuval Steinitz, who was energy minister from 2015 until June, may best be remembered as a champion of natural gas. It was he who refused to set any target for renewable.

Turgeman's firm Noga — Independent System Operator Ltd, was created as part of a structural reform of the inefficient electricity.
