

SolarInvert Energy Solutions

Italian energy storage project announced

Overview

The innovative tolling agreement signed between Zelestra and BKW enables the delivery of one of Europe's largest battery energy storage systems (BESS), of up to 2 GWh, in the north of Italy. Construction is due to start in 2027, with full operations anticipated in 2028. Is Italy a leader in industrial energy storage and commercial energy storage?

Accordingly, there is a growing market for industrial energy storage and commercial energy storage projects, positioning Italy as a leader in advanced Italy storage solutions and renewable energy Italy initiatives.

Will Italy get a state aid scheme for energy storage?

The European Union Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy.

Does Italy need 9gw/71gwh of energy storage?

Italy's TSO Terna says it needs 9GW/71GWh of energy storage by integrate its renewables pipeline. Image: Terna. The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy.

How much will Italy invest in utility-scale storage?

In support of these ambitious objectives, the Italian government recently received approval from the EU Commission for investment schemes aimed at developing at least 70 GWh of utility-scale storage—an initiative projected to attract over €17 billion in investments over the next decade.

How many MW is a battery energy storage project?

Industry insiders expect that battery energy storage projects have accounted for a cumulative 900 MW (assuming four-hour durations). In the 2027 capacity auction, BESS was actively competing with existing gas plants for the first time. This content is protected by copyright and may not be reused.

What technologies can be used for energy storage?

Eligible technologies Terna has outlined are primarily lithium-ion, PHES, compressed air energy storage (CAES), non-lithium electrochemical storage (other types of batteries etc), power-to-gas-to power storage (green hydrogen etc), electrostatic or magnetic storage and electromechanical flywheel storage.
