

SolarInvert Energy Solutions

Jamaica s energy storage container factory

Overview

Why is energy storage important in Jamaica?

Jamaica is committed to reducing its dependence on imported fossil fuels. The country's National Energy Policy sets an ambitious target: 50% of electricity from renewable sources by 2037. Energy storage plays a critical role in achieving this target. Key policy support includes:

How can battery energy storage help Jamaica?

Battery energy storage systems (BESS) are now emerging as a cornerstone technology to address these challenges—helping Jamaica stabilize its grid, unlock more renewable energy, and reduce electricity costs for both consumers and businesses. The country's electricity cost can reach as high as \$0.32 per kilowatt-hour, far above global averages.

Why should a company invest in battery storage in Jamaica?

By integrating battery storage with rooftop solar systems or hybrid microgrids, Jamaican companies can maximize renewable use while gaining financial savings and branding advantages. Beyond the city centers, many Jamaican communities live in remote or coastal areas with limited access to stable electricity.

Will NFE impact Jamaica's energy consumption and fuel sources?

There can be no assurance that these internal estimates are correct or in line with Jamaica's plans for energy consumption and fuel sources in the future. There can be no assurance that NFE would have a positive, similar, or any impact on the energy consumption and fuel sources used in any other jurisdiction in which it operates.

What is the best solar battery for a business in Jamaica?

One recommended option for Jamaican enterprises is the 215kWh Commercial Solar Battery. This modular system is designed for medium to large facilities

such as resorts, logistics centers, and industrial sites.

How much electricity does NFE use in Jamaica?

Based on information about Jamaica's electricity demand in the , Jamaica's average load demand and peak demand, and NFE's installed capacity of over 450 MW in Jamaica. There can be no assurance that other customers or future customers will achieve similar results and actual results could differ materially.
