

SolarInvert Energy Solutions

Japanese wall-mounted inverter price

Overview

What are the newest Japanese air conditioner models?

Here are a few of the newest Japanese air conditioner models on offer in Japan at the moment: Aeolia (Nanoe x) – The newest of the bunch that's able to clear the air as well and provide heating and cooling when needed. Aeolia Sleep – The PX series Eolia sleep Japanese air conditioner is specifically designed to help you get to sleep.

How do inverters save energy?

An inverter modulates power supply frequency to control motor rotation speed. Inverters stabilize temperature by adjusting compressor operation according to load to eliminate waste and save energy. Even adopting an inverter to the fan motors of the indoor and outdoor units provides more precise control and contributes to energy savings.

What is a wall-mounted unit in a rental property in Japan?

Most rental properties in Japan include at least one wall-mounted unit, usually in the living room or bedroom. This type is often used in offices, hotels, or larger homes. The indoor unit is embedded in the ceiling, allowing air to circulate evenly throughout the room. It has a clean look and doesn't take up wall space. However, there's a downside.

How much does a window kit cost in Japan?

Window-type kits start around ¥7,700. Roughly ¥30–40 per kWh before subsidies. 冷房 (cool) / 暖房 (heat) / 除湿 (dehumidify) / 送風 (fan) / ECO (energy-saving) Japan offers more model variations per square metre than many other countries. Here is a quick primer to prevent either overpaying or under-cooling.
