

## SolarInvert Energy Solutions

# Lead-acid battery cabinet site power supply

## Overview

---

What is a battery cabinet / rack?

EverExceed designs customized battery cabinets / racks for individual batteries. The cabinet or racking system can be specified to accommodate any battery cell. From flooded to sealed, from lead acid to nickel cadmium and from vertical to horizontal all kinds of battery cabinet / rack can be designed flexibly to save the space in battery room.

Where should a valve-regulated lead-acid battery be mounted?

Valve-regulated lead-acid (VRLA) batteries can be mounted on racks or in cabinets. The remainder of this paper will address considerations for VRLA placement. Size Generally speaking, the larger the battery (both physically and ampere-hour rated), the more likely a rack configuration will be considered.

Can a battery cabinet be connected to a control panel?

Where required, external battery cabinets can be close-nipped to the control panel to house larger batteries with battery chargers available in some battery cabinet sizes. Charging: These batteries are for use with compatible Simplex battery chargers. Series connections: Connect the batteries in series to produce 24 V system voltage.

Can everexceed provide customized battery rack / cabinet system?

We can supply customized lead acid battery rack and cabinet system for solar, UPS, Telecom, Data center etc. EverExceed designs customized battery cabinets / racks for individual batteries. The cabinet or racking system can be specified to accommodate any battery cell.

How many batteries can a battery cabinet support?

The battery cabinets are available in five different mechanical dimensions. They can facilitate multiple combinations of batteries, up to 63 battery blocks,

connected in series and parallel configurations with positive, negative, and mid-point poles. The battery cabinets also support a maximum Direct Current (DC) voltage of 800Vdc.

Why do you need a battery cabinet?

Ease of use is one of the principle selling points for battery cabinets. It is convenient to service the equipment when the UPS and the battery (ies) are right next to each other. Conversely, it is inconvenient to have to go to a separate room when open-rack batteries are installed.
