

SolarInvert Energy Solutions

Lithium battery energy storage system quotation

Overview

Estimated costs: \$700–\$1,200 per kWh installed, depending on battery type and installation complexity. Long-term savings come from peak shaving, self-consumption of solar energy, and backup power. [Explore available residential solutions: Residential Energy Storage Systems.](#) What happened to lithium-ion battery energy storage systems in November 2024?

In November 2024, the lithium-ion battery energy storage system quotation and winning bid price hit new lows again. The quotation range of lithium-ion battery energy storage systems was 0.398 - 1.395 yuan/Wh, with an average quotation of 0.56 yuan/Wh, a 16.4% decrease compared to October.

What is energy storage price?

The price is the expected installed capital cost of an energy storage system. Because the capital cost of these systems will vary depending on the power (kW) and energy (kWh) rating of the system, a range of system prices is provided.

2. Evolving System Prices.

What is a battery energy storage system?

Battery Energy Storage System (BESS): The complete DC level energy storage system and comprises one or more storage modules with the accompanying BOS so the unit can be electrically connected with other electrical components.

How much does a 1MWh battery energy storage system cost?

For a 1MWh battery energy storage system, Energetech Solar offers a system with a price of \$438,000 per unit for a 500V - 800V system designed for peak shaving applications. There are also quantity discounts available, with the price dropping to \$434,350 for purchases of 3 - 9 units and to \$431,000 for purchases of 10 or more units.

What are energy storage technologies?

Energy storage technologies are used at all levels of the power system. They are priced according to five different power ratings to provide a relevant system comparison and a more precise estimate.

How has the lithium-ion battery price changed in 2024?

Current Market Prices According to recent data from BloombergNEF, in 2024, the global lithium-ion battery prices have seen a significant decline. The cell price has dropped by 30% to \$78/kWh, equivalent to approximately 0.56 yuan/Wh in Chinese currency, while the battery pack price has decreased by 20% to \$115/kWh, or 0.805 yuan/Wh.
