## Overview

---

What is a 48V LiFePO4 battery?

Our 51.2V LiFePO4 battery is commonly called a "48V" battery to align with standard terminology in the industry. Many customers and applications have long used 48V lead-acid batteries, so maintaining this naming convention helps with easier understanding and compatibility.

How do you charge a 48V golf cart battery?

Recommended Charger: 48V 8A LiFePO4 charger (Sold Separate) Dakota Lithium 48V batteries in series should be charged at 57.6 volts higher than AGM or lead acid. Lead acid chargers will work, but will only charge the battery to 80% of capacity. Include 48V 8A LiFePO4 Battery Charger (+\$165.00) Include Golf Cart Battery Wiring Kit (+\$149.00).

Do litime LiFePO4 batteries have a battery management system?

All LiTime LiFePO4 batteries come with an internal Battery Management System, which protects against under-voltage during discharge, over-voltage during charge, over-current during discharge, over-temperature during charge and discharge, and short-circuit protection – protects battery cells from damage.

How do you charge a lithium battery?

There are 2 ways to solve the problem: using an AC-DC lithium battery charger or an MPPT solar charge controller to charge it for 3 to 10 seconds, then the battery can be used normally. If you plan to store the battery for a long time, charge it to a SOC of 50% and perform maintenance every three months.

What battery size do I need for my RV?

The industry standard house battery size used in most RVs, Campers, and #VanLife builds is the DL 100Ah battery. This is a drop in replacement for AGM

and most lead acid batteries. If you are charging off your engine's alternator we recommend a Victron DC-DC smart charger.
