

## SolarInvert Energy Solutions

# Lithuania lithium iron phosphate battery pack

## Overview

---

Are lithium iron phosphate batteries better than other lithium ion chemistries?

Despite having a lower energy density than other lithium-ion chemistries, lithium iron phosphate batteries can provide better power density and longer life cycles. Emerging Power is your premier lithium battery assembler. We manufacture custom lithium iron phosphate battery packs and assemblies for many applications.

What is a lithium iron phosphate battery energy storage system?

The lithium iron phosphate battery energy storage system consists of a lithium iron phosphate battery pack, a battery management system (Battery Management System, BMS), a converter device (rectifier, inverter), a central monitoring system, and a transformer.

What is a rechargeable lithium iron phosphate battery?

Rechargeable lithium iron phosphate batteries use  $\text{LiFePO}_4$  as the principle cathode material. Despite having a lower energy density than other lithium-ion chemistries, lithium iron phosphate batteries can provide better power density and longer life cycles. Emerging Power is your premier lithium battery assembler.

What are the advantages of lithium iron phosphate battery?

Lithium iron phosphate battery has a series of unique advantages such as high working voltage, high energy density, long cycle life, green environmental protection, etc., and supports stepless expansion, and can store large-scale electric energy after forming an energy storage system.

What is lithium iron phosphate (LFP)?

Lithium iron phosphate ( $\text{LiFePO}_4$ ), also called LFP, is one of the more recently-developed rechargeable battery chemistries and is a variation of lithium-ion chemistry. Rechargeable lithium iron phosphate batteries use  $\text{LiFePO}_4$  as the

principle cathode material.

What is lithium hexafluorophosphate in a  $\text{LiFePO}_4$  battery pack?

The electrolyte in a  $\text{LiFePO}_4$  battery pack serves as the medium for the transport of lithium ions between the anode and the cathode. It is typically composed of a lithium - containing salt dissolved in an organic solvent. Lithium hexafluorophosphate ( $\text{LiPF}_6$ ) is a commonly used salt in the electrolyte.

### **Custom LiFePo4 Battery Packs**

We specialise in designing and manufacturing custom battery packs for manufacturers with high-volume production. Please note that we are unable to provide quotations for one-off

**Efficient  
Higher Revenue**

**Intelligent  
Simple O&M**

**Flexible  
Abundant Configuration**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 16A, Compatible with High-Power Modules
- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection
- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-Acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
