# Lithuania modern energy storage battery

## Overview

---

How many battery farms are there in Lithuania?

The system of battery storage facilities, designed to ensure the instantaneous energy reserve for Lithuania, will comprise four battery farms in Vilnius, Šiauliai, Alytus and Utena with 312 battery cubes – 78 in each farm. The total combined capacity of the energy storage system is to be integrated into the Lithuanian grid by Energy Cells.

What is the value of a battery system in Lithuania?

The total value of the project, which is meant to provide Lithuania with an instantaneous electricity reserve and the ability to work independently in isolated mode, will reach 109 million euros. The operator of the battery system is Energy Cells, which is 100 per cent owned by the EPSO-G group of energy transmission and exchange companies.

How will the energy storage system be integrated into the Lithuanian grid?

The total combined capacity of the energy storage system is to be integrated into the Lithuanian grid by Energy Cells. Along with specially made transformers and other equipment, all 312 battery cells have already been installed and connected in the battery parks at the transformer substations.

Will EU grant a battery storage project in Lithuania?

European Commission delegation visiting a Fluence battery storage project in Lithuania. Image: Energy Cells via LinkedIn. Lithuania can move ahead with a scheme to provide €180 million (US\$200 million) in grants to energy storage projects after it was approved by the EU.

What is Lithuania's first commercial battery storage site?

This facility, which is set to become Lithuania's first commercial battery storage site, will significantly increase the country's storage capacity by around 50%. The project, located near the capital city of Vilnius, is expected

to be operational by the end of 2025.

### Will Lithuania have a Battery Park System?

After the tests are complete, the battery park system will be fully integrated into the country's electricity transmission network, increasing the stability and reliability of the Lithuanian electric power system. This will be Lithuania's first battery park system and one of the biggest in Europe.
