

SolarInvert Energy Solutions

Maldives Solar Energy System Engineering Equipment

✓ LIQUID/AIR COOLING

✓ PROTECTION IP54/IP55

✓ PCS EMS

✓ BATTERY /6000 CYCLES

Overview

What is the Maldives solar project?

The Maldives solar project is a 36 MW solar power project and 50 MWh of battery energy storage solutions development across various islands in the Maldives. It also includes grid modernization for the integration of variable renewable energy with the grid, which will be financed under the proposed AIIB loan.

What is the main energy supply in Maldives?

These are calculated based on 2011 data for all the countries except for obtaining the SIDS average where 2009 figures are used. The main primary energy supply in Maldives is still dependent on imported fossil fuel (99.9%). Bulk of this imported fuel is diesel and the main energy used for production of electricity and transport.

Will the Maldives project affect indigenous peoples?

There is no evidence suggesting the presence of Indigenous Peoples in the Maldives. Therefore, the project will not have an impact on Indigenous Peoples.

Maldives Solar Energy System Engineering Equipment

SINOSOAR Successfully won the bid for the Power Plant Control ...

Turkey Solution Provider for Hybrid Solar Power Plant SINOSOAR is proud of its sophisticated R& D team, the self-developed SP Series Battery Inverter, and Energy Storage ...
