# Malta Communications 5G base station installed 125kWh

## Overview

---

Cellular Connectivity was introduced in Malta in 1990 when the first mobile phone call was made over 1G. In 1997, 2G mobile networks were deployed, enabling customers to benefit from better voice call quality.

How fast is 5G in Malta?

The 5G network is capable of speeds of up to 1GB per second. Melita has announced they will be the first in Malta to rollout a nation-wide 5G network, which the telco said will be capable of reaching speeds of up to 1GB per second. Melita customers with Endless bundles and 5G phones or 5G enabled devices can now benefit from the 5G speed.

Why is 5G important for Malta?

The improvement of Malta's physical and digital infrastructure and connectivity is crucial for Malta's vision. We will upgrade over 300 sites with new technology, allowing us to deploy 5G on the whole island. Imagine that you are on holiday in Malta. You're visiting Gozo, a small and tranquil island west of the main island.

How will a 5G loan help the Maltese economy?

This loan finances the Maltese telecommunication company Epic in modernising the island's 5G network, providing better coverage and connectivity in a boost for remote working and economic development. Improved broadband services will help people work flexibly and add jobs by encouraging more companies to establish themselves in the country.

Will epic bring 5G to the island?

Epic Communication, known as Epic, wants to make sure that this doesn't happen — by bringing better 5G network to the island. "We will upgrade over 300 sites with new technology, allowing us to deploy 5G on the whole island," says Antoine Galea, Epic's chief technology and information officer.

Why do we need a better network in Malta?

As a small island nation, Malta relies heavily on sectors such as tourism, finance and information technology. A better network can enhance these sectors by providing faster and more stable connectivity, benefiting businesses, entrepreneurs and visitors. ©Flag of Malta.

What GHz band is used in Malta?

These bands are the 700MHz, 3.6GHz (3.4-3.8GHz) and 26GHz band (24.25-27.5GHz). In Malta, similar to the other European Member States, the UHF band from 470-790MHz is currently being used for Digital Terrestrial Television (DTT) and wireless audio programme making and special events (PMSE).
