

## SolarInvert Energy Solutions

# Middle East brand solar power generator for home use

## Overview

---

Are solar-powered generators worth it?

Solar-powered generators used to be a niche product geared towards off-the-grid living. They still do the job in that scenario, but as the market matures, with an ever-expanding range of sizes and configurations, the quiet, emissions-free generators are becoming an essential source of backup power for all kinds of homeowners.

Should I buy a solar or gas generator?

When deciding between a solar and gas generator, consider your power needs and budget. For lower power needs under 3,000 watts, solar generators are ideal, while gas generators work better for larger demands, especially 10,000 watts or more.

Are solar generators better than gas generators?

While gas generators are effective, they're noisy, fuel-hungry and must be used outdoors to avoid harmful fumes. In contrast, solar-powered generators are emissions-free, safe for indoor use and much quieter, ensuring they won't disrupt your household while keeping everything running.

How long does a solar generator last?

Capacity: 300 watts | Battery type: LiFePO4 | Charge time (solar): 3 to 6 hours | Charge time (AC): 1 hour | Battery shelf life: 3 months | Weight: 7.7 lbs | Dimensions: 9.6" x 8.4" x 5.5" | Life span: 3,000 cycles WHY WE LOVE IT: EcoFlow has one of the most diverse lineups of solar generators.
