

SolarInvert Energy Solutions

Mixed use of photovoltaic panels of different power

Overview

The short answer is, yes, you can mix solar panels that have different wattages. But it is not usually advised, because mixing different wattage panels reduces the efficiency and power output. The reason for this is simple. Different wattage panels have different voltage and amps outputs.

Mixed use of photovoltaic panels of different power

Mixing Different Wattage Solar Panels: Good Practice ...

It's critical to understand that it's not as easy as "more panels equal more power." When making a decision, there are several things to ...

What are the rules for mixing panels of different wattage or even ...

Panels in series limit the current to that generated by the smaller panel, voltage is the sum of the panel volts. Thus panels in series should have similar current outputs.
