

SolarInvert Energy Solutions

Mixing different specifications of photovoltaic panels

Overview

Though mixing different solar panels is not recommended, it's not forbidden and things would be ok as long as each panel's electrical parameters (voltage, wattage, amps) are carefully considered. When you intend to wire two panels produced by different vendors, the vendors are not the problem.

Mixing different specifications of photovoltaic panels

Going Solar: Can I Mix and Match Solar Panels?

Can you mix and match solar panels to meet your energy needs? Learn more about the basics of solar panel systems in this informative article.
