

SolarInvert Energy Solutions

Mobile base station equipment dedicated battery charging

Overview

Where can I Charge my Electric GSE?

Get your electric GSE powered up, right now, anywhere on the ramp. Mobility and Flexibility: As a towable platform, AmpCart brings charging directly to eGSE anywhere on the tarmac, eliminating the need to move equipment to fixed charging stations. This is ideal for operations far from stationary chargers.

How do I charge my equipment?

Charge your equipment and keep the equipment powered, in even more places on the ramp. Grid power flexibility: Connect the AmpCart unit to a single grid input power source, energizing 4 to 6 chargers with dual output cables for fast charging.

What is the ampcart™ towable charging station?

Designed by Oshkosh AeroTech, the AmpCart™ Towable Charging Station speeds your GSE electrification plans — without waiting for lengthy and expensive infrastructure upgrades. Get your electric GSE powered up, right now, anywhere on the ramp.

What is ampcart mobile charging?

AmpCart mobile charging platform enables efficient electric GSE charging anywhere on the tarmac, supporting airports' carbon neutrality goals with flexible power solutions.

What makes Delta-Q a good battery charger?

Delta-Q's scissor and boom lift battery chargers have earned a global reputation for charge quality, integration support, reliability and robustness under difficult charging conditions.
