

SolarInvert Energy Solutions

Moldova Energy Storage Plant Project

Overview

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a project funded by the U.S. Government through USAID. The Ministry of Energy has announced that a tender has been launched for this purpose. How can Moldova improve the energy sector?

National regulatory framework (both primary and secondary) improved in line with Moldovan energy commitments, ensuring that national authorities are better prepared and can respond to emergency situations in the energy sector and to the needs of the most vulnerable energy users;.

How does Moldova share energy data?

Moldova shares energy data through five annual International Energy Agency (IEA)/Eurostat/UN Economic Commission for Europe (UNECE) joint questionnaires.

Does Moldova have gas storage facilities?

Moldova currently does not have operational gas storage facilities. However, the government is considering two possible sites for geological storage in the Zagarancea-Mânzesti-Unghenii de Jos villages area and in the Cantemir district. No concrete decisions have been taken on these developments.

When did Moldova join the Energy Community?

Moldova joined the Energy Community as a full-fledged member in March 2010. Moldova, together with the other contracting parties, has the following tasks and obligations: The Energy Community *acquis communautaire* consists of roughly 25 legal acts.

What is the main energy source in Moldova?

Natural gas accounts for more than half of Moldova's total primary energy supply (53% in 2018), oil roughly a quarter (23% in 2018) and solid biomass

one-fifth (19% in 2018). Most natural gas is used for electricity and heat generation, 3 whereas oil is the most important energy source for final consumers.
