

## SolarInvert Energy Solutions

# Moldova power generation container customization

## Overview

---

Does Moldova have a power grid?

Moldova's electricity grid was predominantly built in the time of the Soviet Union, making it relatively old and inefficient. It is synchronously interconnected with Ukraine's Integrated Power System (IPS) and, in turn, Russia's Unified Power System (UPS) in the northern and south-eastern parts of the grid.

What is a containerized power module?

Fueled by natural gas, the power module is dedicated to the production of electrical energy. Containerized power module with a power output of 3MW. Plymouth, UK. Flexible generation power plant to balance the local electricity network in an area with growing demand. 2 containerized power modules with a combined power of 5 MW. Yeovil, UK.

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

Why do you need a custom modular gas plant?

Our custom modular design allows us to deliver plants that fit your needs. Our plants support different electrical outputs, gas applications, noise levels, exhaust levels, and environments. The plants can be designed for different gas applications like Natural Gas, Biogas, Landfill Gas, and Special Gas.

How much electricity does Moldova consume?

The total electricity consumption in Moldova was 3.8 TWh in 2020, which was up 10% from its level in 2010, with the majority of consumption from the residential sector (45%). Residential consumption grew by 14% between 2010

and 2020, which is considerably less than the global average growth for the same period, which was over 20%.

Which genset containers are available?

All genset containers are also available with an option for  $-40^{\circ}\text{C}$  and most variants can be upgraded for  $+45^{\circ}\text{C}$ . A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.
