

## SolarInvert Energy Solutions

# Morocco household energy storage power wholesale price

## Overview

---

How much does electricity cost in Morocco?

The electricity price for businesses is MAD 1.072 kWh or USD 0.118. These retail prices were collected in December 2024 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Morocco with 150 other countries. Historical quarterly data, along with the latest update from June 2025 are available for download.

Are fuel and electricity prices stable in Morocco?

Fuel and electricity prices in Morocco remained stable between 2022 and 2023. Fuel prices were completely deregulated in 2015. Oil accounts for nearly 54% of total energy consumption, while coal accounts for 31%. Electricity demand is expected to increase by 6%/year by 2030 to 80 TWh.

What type of energy is produced in Morocco?

Based on the United States Energy Information Administration data from 2022, electricity in Morocco is produced from the following sources: fossil fuels 81.89%, wind 12.96%, solar 3.51%, hydro 1.64%, nuclear 0.00%, and geothermal 0.00%. You can also compare the energy mix of Morocco to other countries.

How can Morocco improve energy security?

The Government of Morocco seeks to increase security of supply by reducing dependence on energy imports, including increasing use of renewable sources for electricity production. As of the end of 2022, the share of renewable energy in the electrical capacity mix stood at 38 percent, or 4,154 MW.

Will Morocco generate 70% of its electricity from renewables in 2050?

In its new Low Carbon Development Strategy for 2050, Morocco aims to generate 70% of its electricity from renewables in 2040 and 80% in 2050. Economic Indicators: Annual historical data including population, GDP growth,

imports and exports, inflation rate, energy security and efficiency indicators, CO<sub>2</sub> emissions.

How much solar power does Morocco have?

Morocco has an average solar potential of 5 kilowatt hours (kWh) per square meter per day, although this varies geographically. Total installed capacity from solar energy currently stands at 831 MW. According to the Ministry of Energy Transition, and Sustainable Development, Morocco could potentially generate 25,000 MW of wind power.
