

SolarInvert Energy Solutions

Mozambique photovoltaic module project Changtong

Overview

Who built Mozambique's first large-scale solar power plant?

Capital and expertise from Scatec Solar, KLP and Norfund enabled the construction of Mozambique's first large-scale solar power plant. Central Solar de Mocuba (CESOM) provides over 79 GWh of electricity annually, which is equivalent to the electricity consumption of more than 170,000 households in Mozambique.

How will Mozambique's power plant's strategic location affect the grid?

The project's strategic location will reduce energy transmission losses and improve the security of energy supply in northern Mozambique and stabilize the grid. It is estimated that the power plant's connection to the EDM grid will result in a seven percent improvement in the network default level.

Does Mozambican have a solar vision?

However, the Mozambican government have a vision for the country, based on clean electrification for all. The southern African nation possesses serious solar wealth, with 23 TW of its 23,026 GW estimated renewable potential attributed to solar.
