

SolarInvert Energy Solutions

Netherlands new factory photovoltaic panel price

Overview

On average, the cost of solar panels in the Netherlands ranges from €3,000 to €8,000 per kWp (kilowatt peak) installed. This price range includes the complete installation cost, including materials, labor, and VAT (value-added tax). Can you install solar panels in the Netherlands?

While the thought of diving into a new technological venture in a foreign land might seem daunting, especially with potential language barriers, understanding and installing solar panels in the Netherlands can be rewarding and straightforward.

How much does electricity cost in the Netherlands?

As of February 2024, the average cost of electricity from utility companies in the Netherlands is around \$0.4 per kWh. ³ The Dutch electricity grid is recognized as one of the most reliable globally, with a reliability level of 99.9948% reported by TU Delft, indicating that power supply interruptions are rare and typically of short duration. ⁴

Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US\$ using the US GDP deflator, to account for the effects of inflation.
