

SolarInvert Energy Solutions

New Zealand Park Container Energy Storage

Overview

Where is New Zealand's first large-scale battery storage system located?

Meridian Energy has officially opened New Zealand's first large-scale grid battery storage system at Ruakākā, the first of its kind, and a milestone in the country's renewable energy infrastructure development. The Ruakākā Battery Energy Storage System (BESS) delivers 100 megawatts (MW) of maximum output with 200 MW-hour storage capacity.

Where is New Zealand's first grid-connected battery energy storage system located?

Meridian Energy has completed construction of New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakākā, with an official opening ceremony scheduled for later today.

How important are battery energy storage systems to New Zealand's electricity supply?

Battery energy storage systems are set to play an increasingly important role in New Zealand's electricity supply.

Will New Zealand's first super-sized grid-connected battery improve Northland's energy resilience?

Photo: RNZ/ Peter de Graaf New Zealand's first super-sized grid-connected battery - built at a cost of \$186 million - will help improve Northland's energy resilience in future power outages, Meridian Energy says.

Are solar farms a solution to New Zealand's reliance on fossil fuels?

Solar farms and batteries, alongside hydro stations and wind farms, are part of the solution to reduce New Zealand's reliance on fossil fuels and support our transition to a resilient net zero economy.
