## Overview

---

This is a list of power stations in New Zealand. The list is not exhaustive – only power stations over 0.5 MW and significant power stations below 0.5 MW are listed. Power plants in New Zealand have different generating roles – for baseload, intermediate or peaking. generators are those that run continuously (.

The first wind farm, Hau Nui, was commissioned in 1997. Now wind generation makes up around 5% of New Zealand's electricity generation. Most of New Zealand's wind farms are located in the North Island. Which power supply is best for camping in New Zealand?

Being the smallest type of portable power supply for camping, portable power banks tend to be the best option for campers who are hiking New Zealand's epic trails. If travelling to New Zealand campsites by car or campervan, you can get electricity through your vehicle's battery.

How does electricity supply work in New Zealand?

Supplying electricity to homes and businesses across New Zealand involves three key elements: generating electricity, transporting electricity to distribution companies, and then selling it to customers.

What sectors use the most electricity in New Zealand?

The majority of industrial electricity demand is from the wood, pulp, paper and printing sectors and the basic metals sectors, with the Tiwai Point aluminium smelter being the largest single user of electricity in the country. The commercial sectors consume around a quarter of New Zealand's electricity demand.

Who buys electricity in New Zealand?

Lines companies are mostly owned by consumer trusts or local councils, but some are privately owned. Retail companies buy electricity from generators and on-sell that electricity to businesses and households across New Zealand. For most New Zealand electricity customers, there's a lot of retailers and brands to buy electricity from.

Where can I find information about electricity in New Zealand?

Data tables for electricity [XLSX, 313 KB] From this page you can also access all historical electricity information published by our Modelling and Sector Trends Team. Information is available on New Zealand's electricity supply, demand, and transmission and distribution. Electricity prices are presented on the Energy prices pages. Energy prices.

Is nuclear power used in New Zealand?

Nuclear power is not used in New Zealand. Source: First power station owned by government. Dismantled in 1941. Dam used as popular swimming spot. Decommissioned due to lightning strike damage. Believed to be the oldest hydro electric power station in the world that still operates.
