New energy storage blockbuster

Overview

Tesla has unveiled two new energy storage products: Megapack 3, the latest generation of its utility-scale energy storage system, and Megablock, which integrates Megapack 3 with transformers and switchgear. Could Tesla's megablock save energy?

· Tesla Battery storage like Tesla's Megablock would also allow energy producers like solar and wind installations to offload excess energy when energy generation is highest and discharge that energy when generation is low, for instance at night.

What is Tesla's Energy Storage business?

Politics aside, Tesla's energy storage business is part of Musk's Master Plan Part IV, which is focused on AI and Optimus robot deployment, as well as clean energy capture and storage with Megapacks and Megablocks.

How many homes can a megablock power?

In terms of scale, one MWh of energy could power 200 homes for one hour. The Megablock installations connect Megablocks to one another to provide a vast amount of storage for small municipalities up to larger cities.

Is Tesla expanding its energy storage business?

Though small, Tesla's energy storage business is growing. It's another ancillary business that CEO Elon Musk is focusing on per his Master Plan Part IV. As its car sales stall, Tesla (TSLA) is expanding its growing energy storage business.

Was 2024 a good year for energy storage?

For a good overview of the energy storage situation at the end of last year, focused on batteries collected to act at grid scales, read " 2024 was a fantastic year for energy storage " (Julian Spector, Canary Media).

Is Tesla's Energy Storage business shrinking?

While the energy storage business grows, with Tesla reporting record gross profit of \$846 million in Q2, its bread-and-butter car business is shrinking. Total deliveries in Q2 were down 13% year over year, with automotive revenues down 16%. As its car sales stall, Tesla expands deeper into its growing energy storage business.
