

SolarInvert Energy Solutions

New energy storage project in Lesotho

Overview

What is the energy sector like in Lesotho?

Transformation in Lesotho The energy sector in Lesotho is characterised by an enormous potential of renewable energy resources. Lesotho has the potential to produce up to 6,000 MW from wind and solar, 4,000 MW from pump storage, 400 MW from conventional hydropower, and more than 1.

Can Lesotho produce electricity?

Renewable energy resources. Lesotho has the potential to produce up to 6,000 MW from wind and solar, 4,000 MW from pump storage, 400 MW from conventional hydropower, and more than 1,000 MW from hydropower. However, the current demand for electricity continues to exceed.

How can Lesotho achieve renewable energy potential?

Renewable energy potential. During the next five years, the Government of Lesotho will promote renewable energy by harnessing energy from wind, solar, and water. In addition, the new Energy Bill, currently being approved, will enable the transformation to a full
