

## SolarInvert Energy Solutions

# New photovoltaic panel prices in Belgium

### Highvoltage Battery

## Overview

---

The average solar panel price is around €1.26 per watt peak (Wp), although the exact price depends on a number of criteria: The accessibility of the roof (height, distance between the roof and the fuse box, etc.). Over the coming years, the solar panel subsidy will be gradually phased out. Can I install solar panels myself in Belgium?

There are several companies active in Belgium that install solar panels. There are no conditions specifically for the installation of solar panels, so it is possible to install the solar panels yourself. However, it is advisable to have these works carried out by a recognized technician who can also carry out an inspection immediately.

Should you choose a photovoltaic panel installation project?

Solar energy is becoming increasingly popular and represents a sustainable and environmentally friendly solution for generating electricity. However, before embarking on a photovoltaic panel installation project, compare their prices to make the best choice.

How to choose photovoltaic panels based on your budget?

Before choosing photovoltaic panels based on your budget, it is essential to take into account several criteria: – Efficiency The efficiency of the panels determines the amount of solar energy they can convert into electricity. The higher the efficiency, the less surface area you will need to produce.

How do subsidies affect the installation of photovoltaic panels?

In many countries, subsidies are offered to encourage the adoption of solar energy. These aids can reduce the initial cost of investment, making the installation of photovoltaic panels more affordable for homeowners and businesses. Discover photovoltaic panel prices with Evocells. We will guide you through your installation.

What are the different types of photovoltaic panels?

There are two types of photovoltaic panels: Monocrystalline panel: They are black, most efficient in energy production, but also more expensive. Polycrystalline panel: They are blue, less efficient in energy production, but also less expensive. The choice between the two panels is based on price, space, and aesthetics.
