Niger energy storage prices

Overview

Where can I find information about energy in Niger?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Niger on the IEA homepage. Find relevant information for Niger on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

How much energy does Niger have?

Niger is rather well endowed with energy resources; its recoverable reserves of uranium are the 6th largest in the world, at 315 kt in 2020 (at less than US\$260/kgU), while its coal and oil reserves reached 6 Mt and 20 Mt, respectively, at the end of 2020. Its hydroelectric potential of 280 MW has not yet been developed.

What are the biggest issues facing Niger's energy sector?

Power Africa Lists the following issues as the biggest to face Niger's energy sector : Climatescope 2019 lists the clean energy policies and investments for Niger.

Will Niger reach 750 MW by 2035?

Niger aims to reach an installed capacity of 750 MW by 2030 and an electrification rate of 100% by 2035. In the long run, the country plans to fully open its power sector to private investors. Nigelec dominates the power sector; its concession for the public service of electricity was extended until 2043.
