

SolarInvert Energy Solutions

Nordic commercial energy storage device

Overview

What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

What is the largest energy storage investment in the Nordics?

“It is a great honor to inaugurate the largest energy storage investment in the Nordics, with 211 MW now connected to the power grid. “Thanks to the efforts of Ingrid Capacity and BW ESS, we are reducing grid congestion and enabling increased power production.”.

What is the largest energy storage park in the Nordic region?

Romina Pourmokhtari, Sweden’s Minister for Climate and Environment, officially inaugurated the largest energy storage park in the Nordic region. The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 MW/211 MWh.

Who oversees the connection to the Nordic power grid?

The connection to the grid was overseen at the time by the Swedish minister for climate and the environment, Romina Pourmokhtari. Among her comments at the ceremony, Pourmokhtari said: “It is a great honor to inaugurate the largest energy storage investment in the Nordics, with 211 MW now connected to the power grid.

Are Nordic batteries looking for a development engineer?

Nordic Batteries are seeking a development engineer for mechanical construction and system design. Factor 47 is operative! The pilot line where Nordic Batteries will produce their first battery modules is now officially open

after the visit from former Prime Minister Erna Solberg where she cut the banner to kick it off.

Which ESS project is 'biggest in the Nordics'?

The title of 'biggest in the Nordics' is a fun one to aim at for ESS companies. And deciding which project is biggest can depend on the definition. For example, Neoen claimed it would hold the record in January, when it announced a 93.9 MW / 93.9 MWh project in Sweden at the Isbillen Power Reserve, on January 30.
