Octave Battery Cabinet Price

**Low Voltage
Lithium Battery**

6000+ Cycle Life

Overview

What is the storage capacity of the octave Battery Cabinet?

It houses two strings of second-life batteries connected in parallel, and all protective equipment and switchgear needed for the safe and smooth operation of the batteries. The total storage capacity of the batteries is 242 kWh. The outdoor Octave battery cabinet also comes with.

What is an outdoor octave Battery Cabinet?

The outdoor Octave battery cabinet consists of an outdoor rated, double-walled (insulated) cabinet with an HVAC system and an integrated heater. It houses two strings of second-life batteries connected in parallel, and all protective equipment and switchgear needed for the safe and smooth operation of the batteries.

How long do octave battery cabinets last?

We guarantee that the energy storage capacity of the Octave battery cabinets stay at a minimum of 70% of the original capacity for a period of 10 years with a maximum number of performed cycles. We optimize the charging and discharging of the battery system throughout the operational life of the battery, in real time.

Are octave batteries certified?

Yes. Our battery systems are certified and of outstanding quality. Octave re-uses premium battery modules originally designed for high-end electric vehicles. Furthermore, we continuously monitor all battery cells to ensure maximum performance of your battery system. What are the safety risks associated with Li-Ion batteries?

.

Are octave battery cabinets safe?

Safety is Octave's top priority. Safety is embedded in the design of the system and several measures have been implemented to ensure safe operation of your battery system. You can find more detailed info on the technology page. The Octave battery cabinets are CE certified.

Does the octave circular battery cabinet have a fire detection and extinguishing unit?

Both the indoor and the outdoor battery cabinets can be equipped with a fire detection and extinguishing unit. Our Octave Circular battery cabinet houses used batteries from electric vehicles. When these batteries come out of the electric vehicle, they typically retain an energy storage capacity of 80% or more.
