

SolarInvert Energy Solutions

Oman Energy Storage Electricity Company

Overview

What percentage of Oman has access to electricity?

According to the World Bank, access to electricity amount to 98.0 %. The Oman Power and Water Procurement Company (OPWP) is the planning body for power supplies in the country. OPWP is responsible for securing electricity and water production capacities in the country and the single buyer of power and water for all IPP/IWPP projects.

What will Oman's new energy policy mean for the energy sector?

The move – a first in Oman's power sector – will help support the large-scale adoption of renewable energy resources for electricity generation, as well as accelerate the decarbonization of the electricity sector, according to a key executive of the state-owned entity – a member of Nama Group.

Who is responsible for Oman's electricity network?

Established in 2003, the Oman Electricity Transmission Company is in charge of the country's electricity transmission networks. ►Go To Top In October 2012, the German Helmholtz Association and the Omani research funding body, The Research Council (TRC), signed an agreement in Berlin to foster the cooperation between the two countries.

Can solar energy generate electricity in Oman?

Solar energy can potentially generate electricity to meet all of Oman's domestic electricity requirements and provide some electricity for export.

What is the main energy source in Oman?

Unlike the national energy production, gas accounts for the largest amount of primary energy supply in Oman (18,040 ktoe), followed by crude oil (9,927 ktoe). Oman is a fossil fuel exporting country. In 2011, the country was exporting 39,481 ktoe of crude oil, 2,152 ktoe of oil products and 9,797 ktoe of natural gas.
