

SolarInvert Energy Solutions

Outdoor Power Battery Module

Overview

What is the outdoor battery unit?

The Outdoor Battery unit is designed for back-up applications up to 2000W, with the possibility to mount up to 6 units in parallel for increased capacity. When you visit any website, it may store or retrieve information on your browser, mostly in the form of cookies.

Do I need a battery enclosure for my off-grid system?

If you're using batteries with your off-grid system, you will need to protect them from the elements and separated from living areas. Often that means a dedicated enclosure. We supply various sizes of enclosures for holding batteries and associated electronics.

How many batteries can a metal battery box hold?

We supply various sizes of enclosures for holding batteries and associated electronics. Our most popular metal battery boxes are the NEMA 3R (rainproof), mill finish aluminum boxes, which can hold from a single battery up to 6, 8, or 10 if pad mounted. Many standard mill finish aluminum metal battery boxes are in stock, ready to ship.
