

SolarInvert Energy Solutions

Outdoor power supply Outdoor high power

Overview

Are outdoor power strips waterproof?

Some outdoor power strips also function as surge protectors and have built-in fuses that cut off the flow of current when it exceeds the maximum wattage for a standard 15-amp outlet, which is 1,875 watts. Outdoor power strips designed for continuous outdoor use also have an IPX rating, which designates how water-resistant they are.

Should you buy an outdoor power strip?

If those two sockets in your outdoor outlet aren't enough to fulfill your outdoor power needs, then you'll want to invest in a good outdoor power strip. These handy appliances can multiply a single socket into six or even 10, allowing you to power multiple strings of lights or various outdoor appliances simultaneously.

Are outdoor power strips Wi-Fi Ready?

Some outdoor power strips are Wi-Fi ready, allowing them to connect to your home network. These smart power strips can be controlled via a smartphone app, which is ideal for turning on and off holiday lighting displays.
