Outdoor power supply assembly and matching

Overview

For the purposes of this example, our electrician will be wiring up an outdoor socket in a rear garden, some way from the property so will be running SWA cable to the location. As.

As we are dealing with electricity outdoors there is always the potential for it to come into contact with the elements, namely water and moisture. Due to this, an outdoor socket should be at minimum IP66 rated, making it water and dust resistant. Additionally, any.

There are many different types of exterior socket available on the market today, some cheap, some rather more expensive. Generally as with.

Where you sight your exterior socket is extremely important. You want to ensure it is in a place where it is easily accessible when needed, fixed.

As an outdoor socket will be exposed to the elements e.g. water and moisture, to prevent it shorting out and causing untold issues with your home electrics it needs to be sealed and protected. To these ends, it should be at minimum IP66 rated meaning that it is waterproof.
