# Overseas New Energy ESS Trade

## Overview

---

Are US tariffs affecting ESS?

U.S. trade tariffs on components could further complicate the global ESS landscape. Imposed tariffs on imported Chinese batteries have heightened project costs, leading to strategic re-evaluation among market players.

What's new at ESS?

With increasing cell capacity, ESS keeps transitioning to higher-capacity cells, 5 MWh+ containers, and 400 kWh+ all-in-one systems. These can also be seen this year. Additionally, some products targeting specific European applications were introduced.

What is the ESS strategy?

The main strategy outlined the establishment of an ESS-based, flexible power system, and the goal of ranking among the global top three ESS powerhouses with aim to occupy 35 percent of the world's ESS market.
