

## SolarInvert Energy Solutions

# Pack lithium battery automatic assembly price

## Overview

---

What is automatic Li-ion battery pack production line?

Automatic Li-ion battery pack production line, is an automated assembly line from cylindrical li-ion cells to semi-finished li-ion battery packs which are ready to connect with BMS. This automatic li-ion battery pack production line incorporates below assembly processes into one.

What is a lithium-ion battery pack?

The Lithium-Ion battery packs at La-Z-Boy have multiple functionalities. Here are some of them in a nutshell. Works with all La-Z-Boy power recliners, sofas, and sectionals (excluding lift chairs). Red flashing light while charging, green steady light when fully charged (approx. 5-7 hours charge time).

What are the advantages of automated battery pack production line?

This automated battery pack production line is highly efficient and it can handle 5000~6000 cells per hour. Moreover, it minimizes the quantity of workers and entire production line only needs 3 standby workers, so it's an ideal solution for those areas with very high labour costs.

What do we have for lithium-ion battery pack assembly?

For lithium-ion battery pack assembly, we offer complete solutions. This includes different sizes of barley paper, battery cells, plastic holders, nickel strip, handheld spot welder, PVC, and high-temperature resistant adhesive tape. We also provide rolls of various widths and cut the length as per customer requirements.

What is the cost of a lithium ion battery pack?

Thanks in part to our efforts, the cost of a lithium ion battery pack dropped from \$900/kWh in 2011 to less than \$140/kWh in 2020. We're looking to build on that progress in the years ahead.

## Pack lithium battery automatic assembly price
