

## SolarInvert Energy Solutions

# Pakistan energy storage system configuration foreign trade

## Overview

---

Why is Pakistan pursuing innovative solutions in energy storage & power management?

As Pakistan faces increasing energy demands, the country is actively pursuing innovative solutions in energy storage, and power management. Key sectors such as solar, wind, and hydro are growing, and advances in battery storage, grid optimization, and smart infrastructure are making reliable, clean energy more accessible.

Does Pakistan meet its foreign exchange and energy needs?

In the long-term forecasts and objectives, the most important thing is to state the dogma that the country meets its foreign exchange and energy needs. The Pakistani government needs to improve relations with countries enriched with future energy resources.

What type of energy does Pakistan use?

Pakistan generates its power from an energy mix that includes oil, gas (natural gas and liquefied natural gas, LNG), coal, renewable sources (solar, wind and hydro energy), nuclear, and biomass. Pakistan's energy sector is heavily dependent on imported fuel (oil and LNG) and will continue to rely on imports of both for the next 10-15 years.

How can China make the most of energy storage systems?

The country can make the most of energy storage systems as planned renewable energy projects under China-Pakistan Economic Corridor (CPEC) include a solar park, four wind farms, and three hydro plants that together would generate around 3,900MW, at a cost of about \$7.5 billion.

What is the refining capacity of Pakistan?

Total refining capacity of Pakistan is 19 million tons, however, the capacity could not be fully utilized owing to non-upgradation of refineries, technical and

financial constraints. In 2019, the country produced 4.3 million metric tons of crude oil, enough to meet only 20 percent of the country's total petroleum requirements.

Does Pakistan have shale gas reserves?

According to the Energy Information Administration, Pakistan holds sizeable shale gas reserves and the Pakistani government has provided investment incentives for shale gas development.
