Panama Energy Storage Power Station Peak and Valley Electricity Prices

Overview

What is the price of electricity in Panama 2023?

The price of electricity for households and businesses in Panama, as of September 2023, is PAB 0.170 per kWh or USD 0.170 per kWh. This includes all components of the electricity bill such as the cost of power, distribution, and taxes.

How much does electricity cost in a valley?

Table 1 shows the peak-valley electricity price data of the region. The valley electricity price is 0.0399 \$/kWh, the flat electricity price is 0.1317 \$/kWh, and the peak electricity price is 0.1587 \$/kWh. The operation cycles (charging-discharging) of the Li-ion battery is about 5000–6000.

What is the scale of the energy storage system and operation strategy?

The scale of the energy storage system and operation strategy was related to the technical and economic performance of the coupling system , . In order to reduce the extra cost of the BESS, it is necessary to conduct the optimization research of the BESS and RE coupling system .

How can a large-scale energy storage system help a power surge?

Large-scale RE connected to the grid will bring a power surge or power failure. By constructing a suitable battery energy storage system (BESS) and RE coupling system, using the BESS to store and release RE to stabilize RE's volatility and intermittent, thereby increasing RE's penetration and resilience , .

What is the difference between Peak-Valley electricity price and flat electricity price?

Among the four groups of electricity prices, the peak electricity price and flat electricity price are gradually reduced, the valley electricity price is the same, and the peak-valley electricity price difference is 0.1203 \$/kWh, 0.1188

\$/kWh, 0.1173 \$/kWh and 0.1158 \$/kWh respectively. Table 5. Four groups of peak-valley electricity prices.
