Peru solar photovoltaic panel subsidies

Overview

How many solar photovoltaic projects are planned in Peru?

Table 17 shows that there is a total of 33 solar photovoltaic facility projects planned to be executed in Peru between 2024 and 2028. Furthermore, it is possible to see that the projects are in the northern zone (Piura) and southern zone (Ica, Tacna, Moquegua, Puno and Arequipa) of Peru.

Can solar energy be used in rural areas in Peru?

A promising large-scale advance of clean energy has been achieved in Peru through the under-functioning of solar PV facilities, but the implementation of solar energy on a smaller scale still needs to be promoted in remote communities in rural areas [21, 51].

What is the solar energy industry doing in Peru?

The solar energy industry is following the advances of the wind energy industry in Peru, where all stakeholders (communities, authorities, investors, and NGOs, among others) of the territory are accepting this clean energy as a road to reach sustainable development.

What is the development of solar PV energy in Peru?

Finally, Figure 21 shows the development over time of the installed capacity in MW of solar PV energy in Peru. Figure 21. Evolution (years) of the solar photovoltaic installed capacity (MW) in Peru. Figure 21 shows that the first stage of solar PV energy in the country began in 2012, with strong growth from 2012 to 2023.

What technological advances are applied in photovoltaic solar energy plants in Peru?

Finally, we can mention one of the most important technological advances applied in photovoltaic solar energy plants in Peru, the use of photovoltaic panels called bifacial solar panels. Bifacial solar panels can capture energy on

both sides of the photovoltaic solar panel, whereas monofacial modules only receive energy on their front side .

What is the useful solar energy technical potential for Peru?

The useful solar energy technical potential for Peru is equivalent to 25,000 MW. Table 2 shows details of the geographical areas of the country with the greatest average solar energy, where values between 4.00 and 7.00 kWh/m² /day are recorded. Table 2. Geographical areas of Peru with the greatest average daily solar energy .
