

SolarInvert Energy Solutions

Photovoltaic energy storage complete set

Voltage range

636V-876V

Rated voltage

768V

Cell type

Lithium iron phosphate

Overview

Is a solar home kit a good investment?

A solar home kit is a great investment to supply your home with clean, renewable power. SunWatts can help you find and install the perfect solar kit for your home. Complete solar panel system kits that are the most energy efficient and reliable on the market today.

What are all-inclusive solar kits?

These all-inclusive solar kits are designed for simplicity, featuring everything you need for a seamless setup and installation. With high-performance lithium battery options and versatile connectivity options, our solar power systems can be connected to solar, wind, backup generator, or utility grid sources.

Should I buy a battery with my solar kit?

Purchasing a battery along with your solar kit offers a pathway to energy independence from your utility company, especially when they provide a meager buyback rate for surplus energy you send to the grid. With a battery storage system in place, excess solar energy can be stored instead of sold to the utility for low rates.

Photovoltaic energy storage complete set

5 kWp PV system complete set-Full Black solar modules

Designed and manufactured by Deye, this lithium iron phosphate storage is engineered to maximize longevity while minimizing electricity bills. It is ideal for applications that require high ...
