

SolarInvert Energy Solutions

Photovoltaic inverter channel sales

Overview

How much is the PV inverter market worth?

The PV inverter market was valued at USD 25.5 billion, USD 29.9 billion, and USD 34.6 billion in 2022, 2023, and 2024, respectively. The string inverter market is expected to grow at a CAGR of 9.8% between 2025 and 2034 due to their cost-effectiveness, scalability, and ease of installation.

What was the market size of PV inverter in 2024?

The market size for PV inverter was valued at USD 34.6 billion in 2024 and is projected to reach USD 90 billion by 2034, growing at a CAGR of 9.5% during the forecast period. What was the market share of the three-phase segment in 2024?

.

How is PV inverter market segmented?

Based on phase, the PV inverter market is segmented into single phase and three phase. The three phase segment held 86% market share in 2024, owing to swift industrial development favored by commercialization throughout the emerging countries, along with considerable operational flexibility across various applications.

Who is influencing the solar inverter market?

The inverter market faces intense competition from several multinational companies and regional players. Established companies such as SMA, Huawei, Sungrow, and others are influencing the market growth with their innovative and broad product portfolio and strong R&D in solar inverters.

What is the global inverter market report?

The market report presents an in-depth analysis of the various service providers that are involved in offering inverter market, across different

segments, as defined in the table below: The global inverter market is segmented into various types of products, such as central inverters, hybrid inverters, microinverters, and string inverters.

What is the global market for central inverters?

The global market for central inverters is anticipated to be over USD 30.8 billion by 2034. These inverters have been categorized as stationary inverters primarily serving across a large-scale solar farm or a utility-aided solar deployment.
