

## SolarInvert Energy Solutions

# Photovoltaic panel roof factory

## Overview

---

Can a solar PV system be installed on a factory roof?

As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it. While reducing energy costs, a solar PV installation has the added benefit of demonstrating Corporate Social Responsibility thanks to its environmental credentials.

Can solar panels be installed on a warehouse roof?

Solar panels are also less susceptible to damage from wear and tear because they do not have any moving parts. As a result, you can expect little to no repairs. A typical warehouse or factory roof is the perfect landscape for a solar system. These roofs are usually large and flat with ample room for solar panel installation.

What are the benefits of solar PV on warehouse roofs?

As energy efficiency rises to the top of the agenda for warehouse and logistics firms, more and more are seeing the benefits of solar PV. Installing solar PV on warehouse roofs means generating free electricity for the warehouse and adjacent buildings, such as offices.

Why should you install solar on your warehouse or factory roof?

It's also a renewable energy source, so it will never run out. Installing solar on your warehouse or factory roof demonstrates corporate social responsibility and lowers your carbon footprint. A solar system requires minimal maintenance to keep in good condition.

Which companies have a solar PV system?

Flooring installation specialists, F. Ball & Co are loving their 300kW solar panels. Conveyor maintenance solutions company, Conveyor Systems Ltd, have added a solar PV system to their already sustainable company.

Manufacturers, Tappex Threads Inserts, are ready to start saving money on their electricity bills with their 94kW solar PV system.

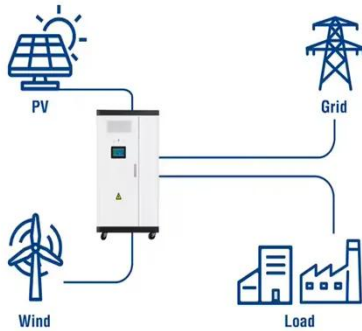

How can a flat roof power a factory?

Leverage the flat roofs of factories to generate additional power for electricity-intensive machinery or HVAC systems. SolarEdge's energy ecosystem is designed to maximize energy cost savings, seamlessly integrating PV, EV charging and storage solutions, promoting safety in combustible environments, and minimizing carbon emissions.

#### Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Oversizing
- Max. PV Input Current 16A, Compatible with High Power Modules

#### Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

#### Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-Acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
