

SolarInvert Energy Solutions

Photovoltaic panel specifications in Northwest Spain

Overview

What are the targets for photovoltaic energy in Spain?

The targets for photovoltaic (PV) energy in Spain are outlined in the “Integrated National Energy and Climate Plan” (PNIEC). The 2023 update of the PNIEC, published in September 2024, sets the following targets for 2025 and 2030: • Total PV target for 2025: 46,5 GWn • Total PV target for 2030: 76,3 GWn • Self-consumption PV target for 2030: 19 GWn.

What is the photovoltaic landscape in Spain?

The photovoltaic landscape in Spain is very positive. The country has a large number of hours of sunshine per year, making it an ideal location for solar power generation. In 2021, installed PV capacity in Spain reached 18,994 megawatts (MW), a growth of 29.9% compared to the previous year.

What are the requirements for installing a photovoltaic system in Spain?

The requirements for installing a photovoltaic system in Spain are as follows:
Obtaining administrative authorisation: In general, it is necessary to obtain administrative authorisation to install a photovoltaic system. The authorisation must be requested from the local council of the municipality where the system is to be installed.

Why is photovoltaic energy so popular in Spain?

The photovoltaic sector employs more than 50,000 people in Spain. Photovoltaic energy has contributed to avoiding the emission of more than 10 million tonnes of CO₂ in Spain. As you can see, photovoltaic solar energy has gained popularity in Spain for a number of key reasons.

Which autonomous communities have the highest PV capacity in Spain?

The autonomous communities with the highest installed PV capacity are Castilla-La Mancha, Andalusia, Extremadura and Region of Murcia. The photovoltaic sector employs more than 50,000 people in Spain. Photovoltaic

energy has contributed to avoiding the emission of more than 10 million tonnes of CO₂ in Spain.

How will the European Commission affect the photovoltaic industry in Spain?

The European Commission (EC) has presented 2 measures that will have an impact on the photovoltaic industry in Spain: The Net-Zero Industry Act (as a response to the US Inflation Reduction Act) and the REPower EU (as a response to the energy dependence).

Photovoltaic panel specifications in Northwest Spain

National Survey Report of PV Power Applications in Spain

The PV power systems market is defined as the market of all nationally installed (terrestrial) PV applications with a PV capacity of 40 W or more. A PV system consists of modules, inverters, ...
