

## SolarInvert Energy Solutions

# Photovoltaic rooftop solar panels in the UAE

## Overview

---

When will solar panels be installed in Dubai?

HH Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai has called for solar panels to be installed on every roof in Dubai by 2030, with the Dubai Clean Energy Strategy 2050 having interim targets of 7% of solar power by 2020, and 25% by 2030.

Are rooftop solar panels a viable option in the Middle East?

Rooftop solar PV panels are common in a number of countries, but are only now gaining real popularity in the Middle East. Despite the sunny climes, there are still a number of barriers to switching to solar PV. Electricity tariffs are generally low, discouraging customers from switching to self-generated electricity.

Is the UAE a 'front runner' for solar PV?

The Middle East Solar Industry Association (MESIA) describes the UAE as a regional “ front runner ” for PV with Oman starting to add more significant projects to the regional PV pipeline. Rooftop solar PV panels are common in a number of countries, but are only now gaining real popularity in the Middle East.

Why should you choose Al Shirawi solar?

Al Shirawi Solar has installed over 35 MW of rooftop and solar carpark shades across UAE. Demonstrating our strong commitment to and belief in the Shams Dubai Initiative, promoting sustainability now and for future generations. Solar energy is a clean, renewable resource that reduces reliance on fossil fuels, mitigating climate change.

Can solar panels be installed on residential properties?

In line with these targets, both countries have launched initiatives to install

solar photovoltaic ( PV) panels on residential properties as well as on public and private facilities.
